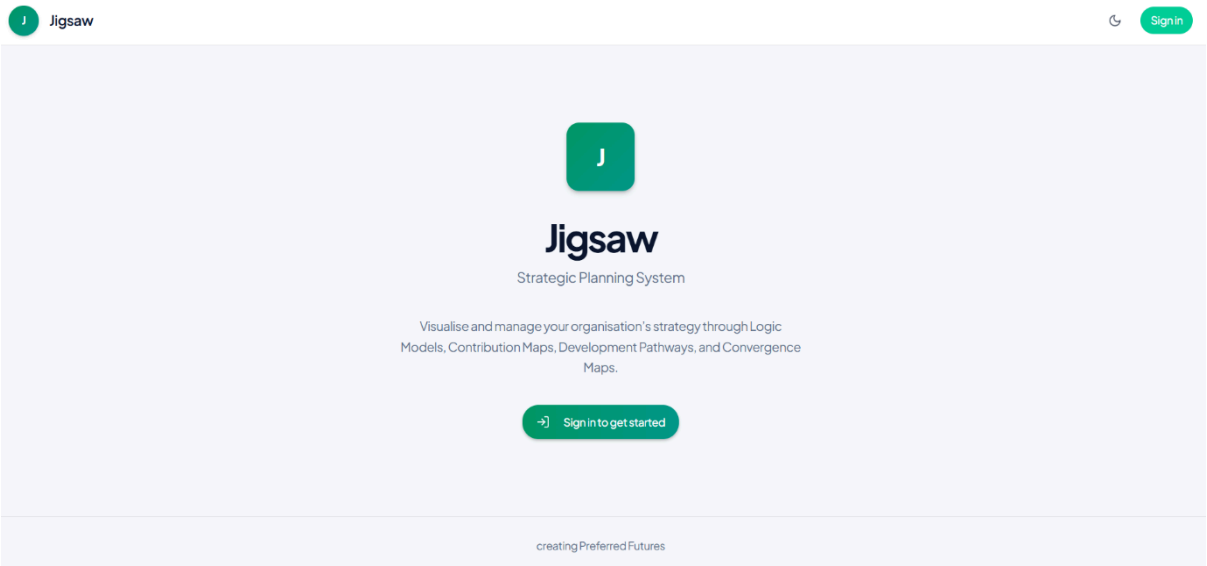
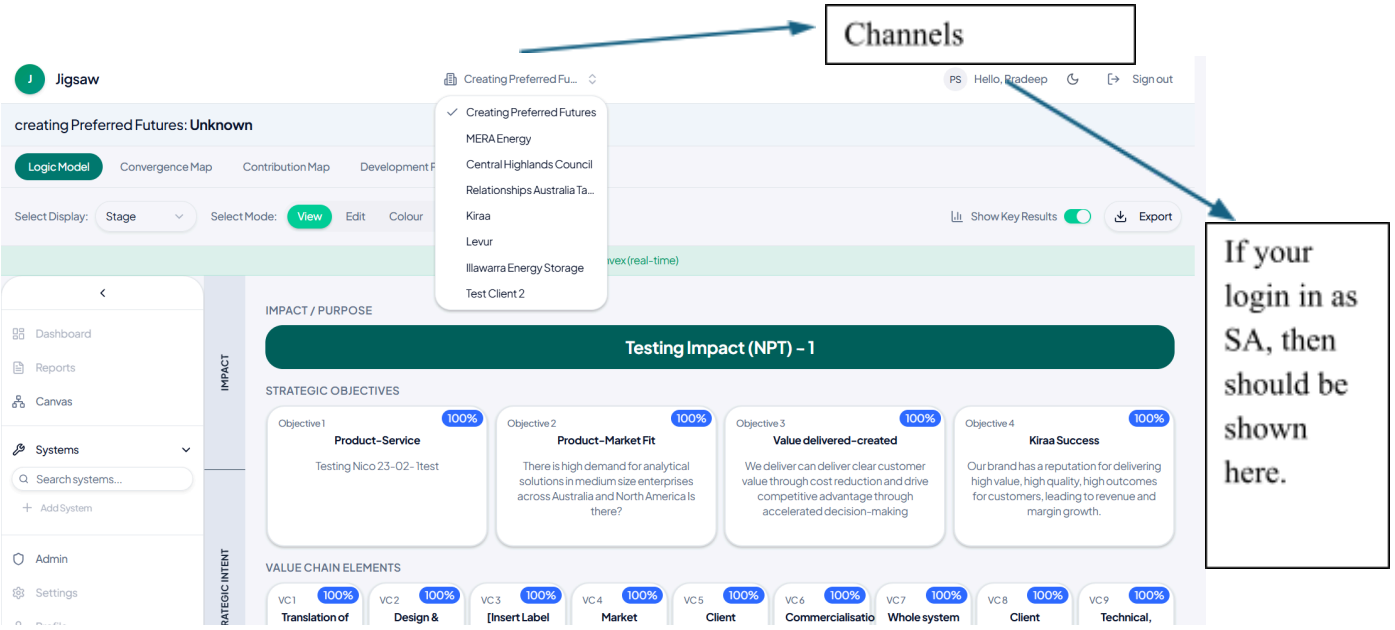
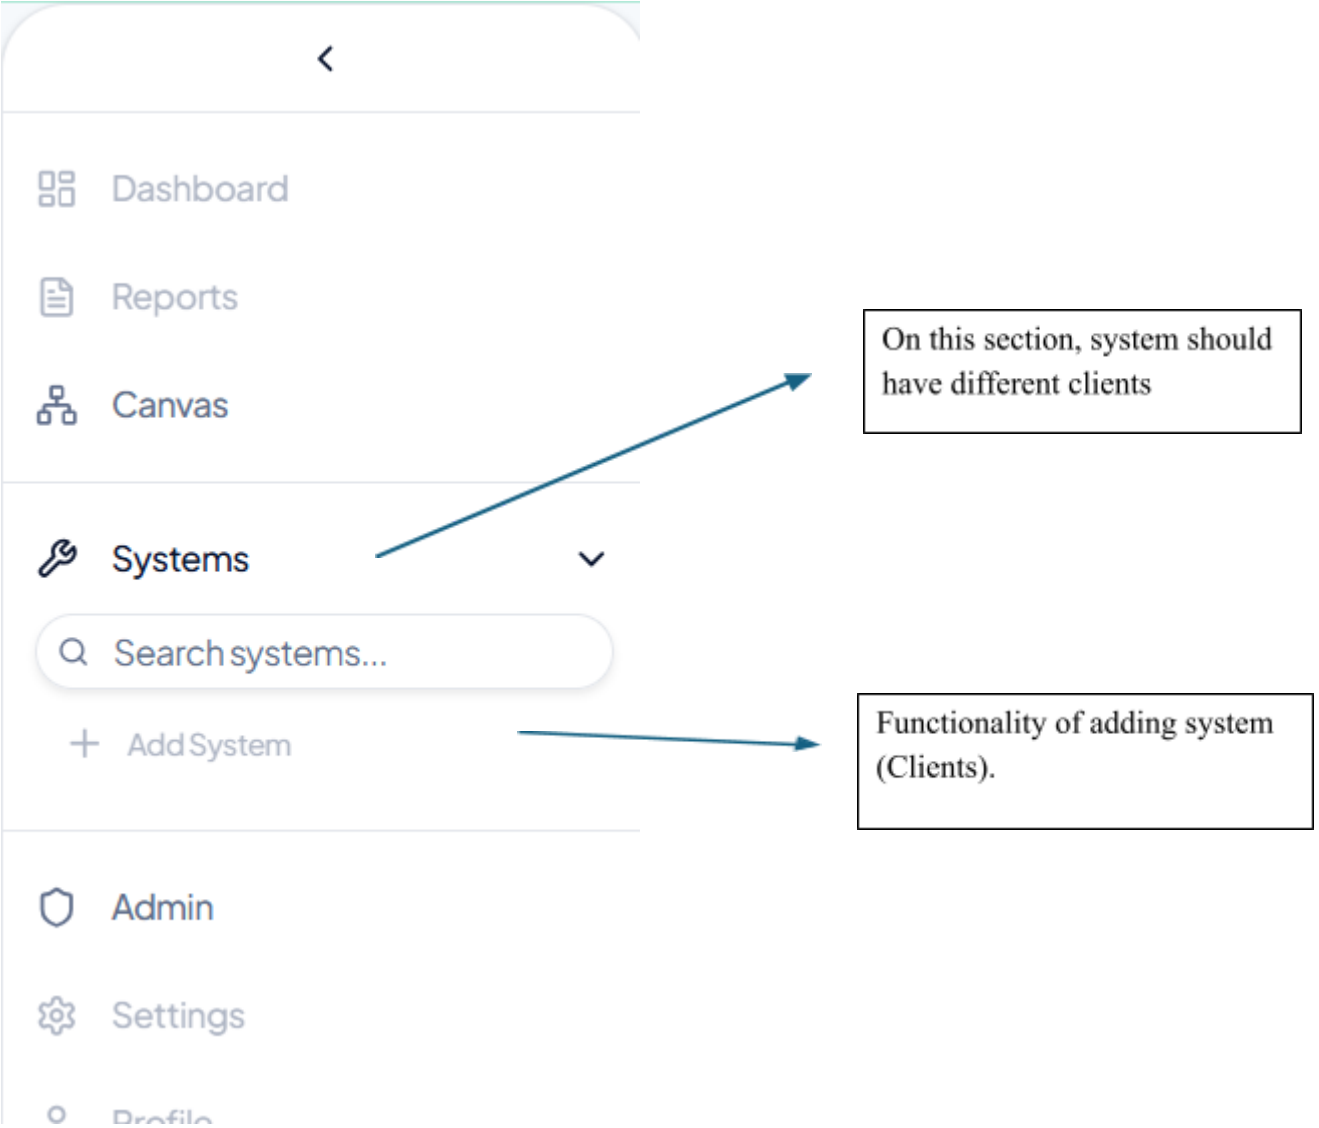
Error and bug of all

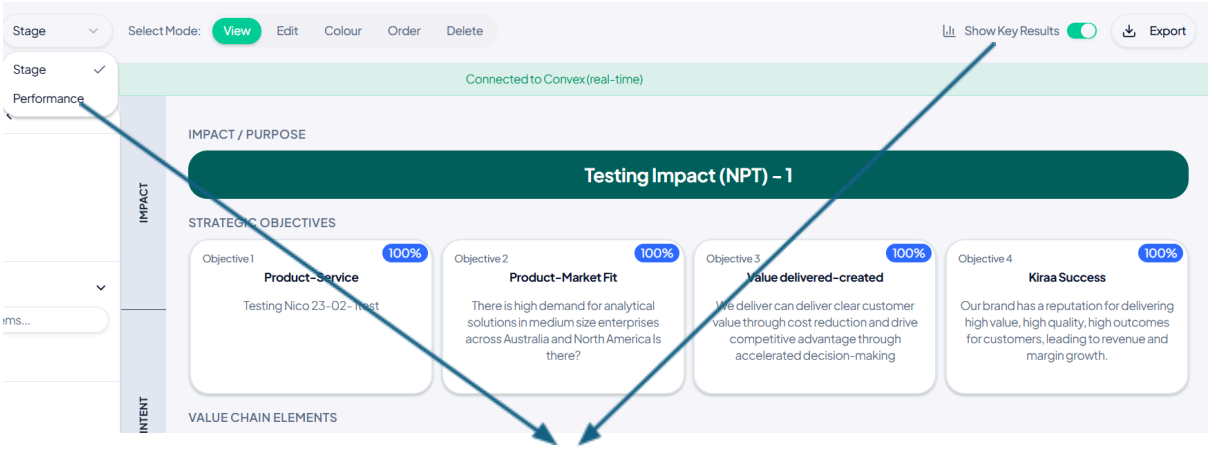


- Two signs in button, should be fine with one if you registering one or can login at top right-hand side instead and also notification whether the user want to save the password and keep logged in.

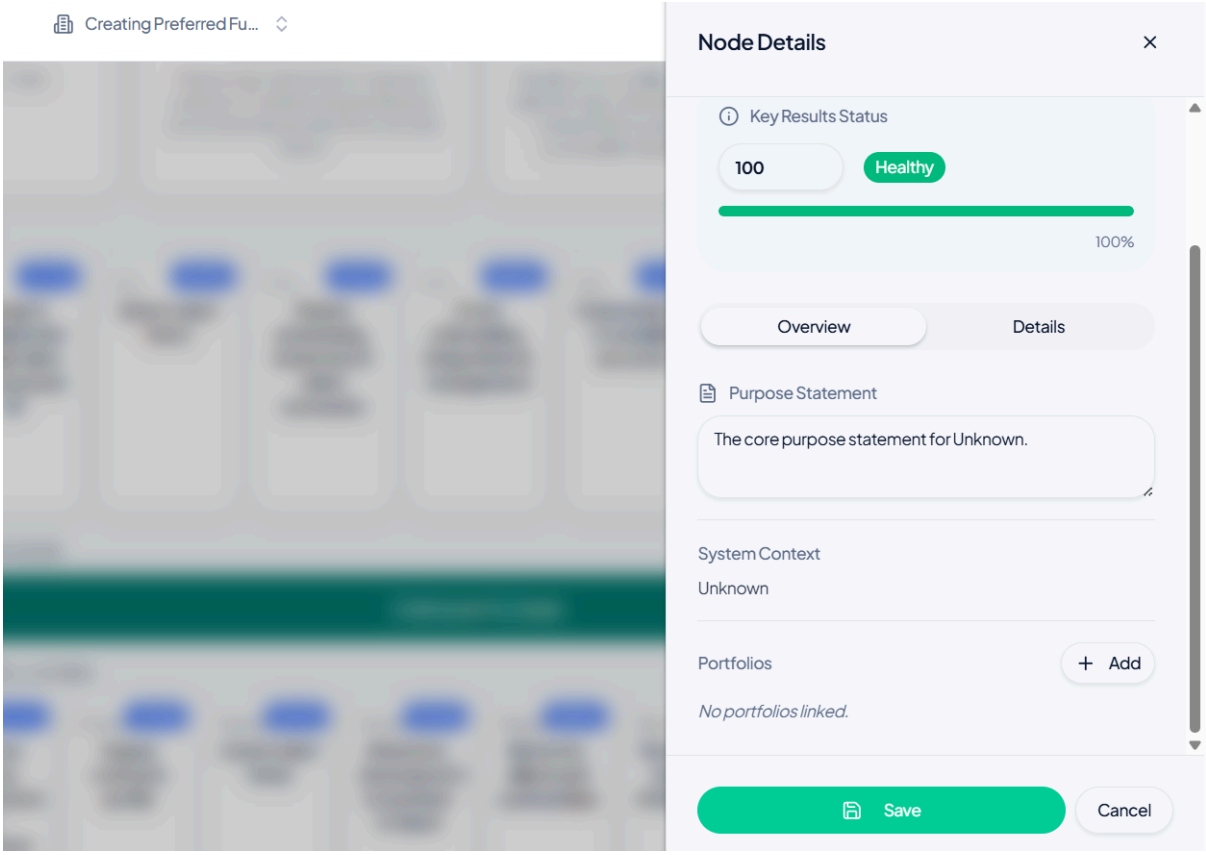


- On this section, better to act as a super administrator, instead of showing all the client and channels together.

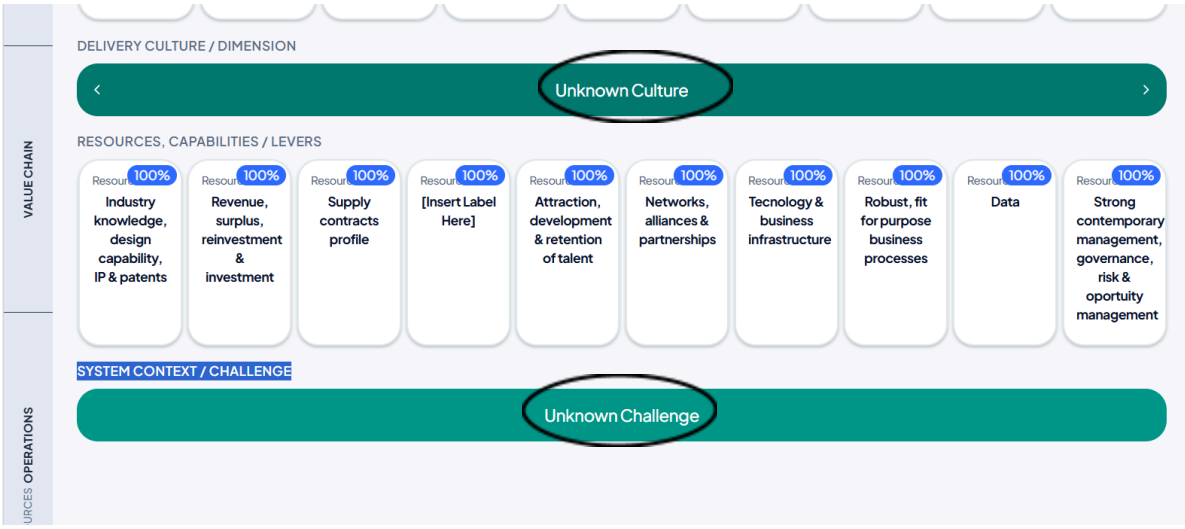


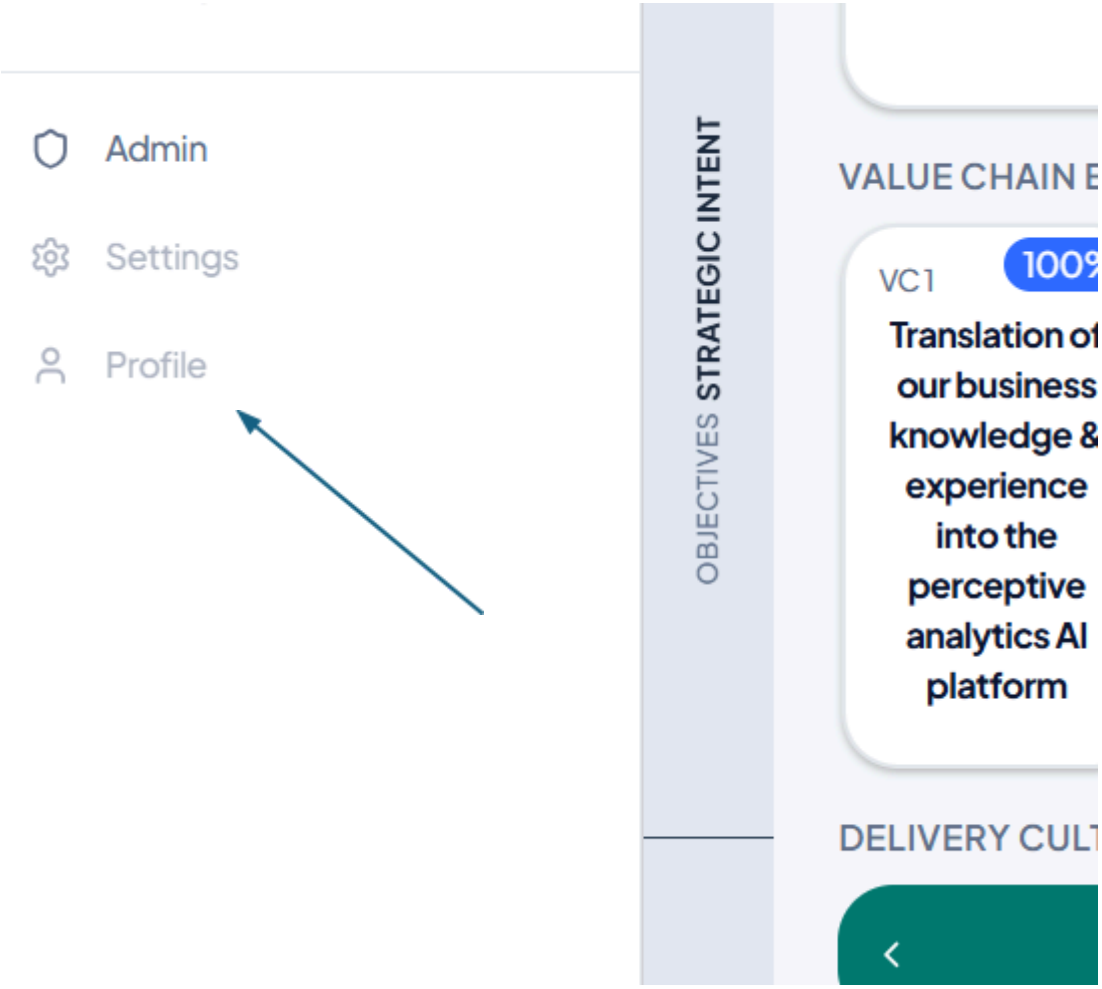


- Both has the same function with KPI keys.

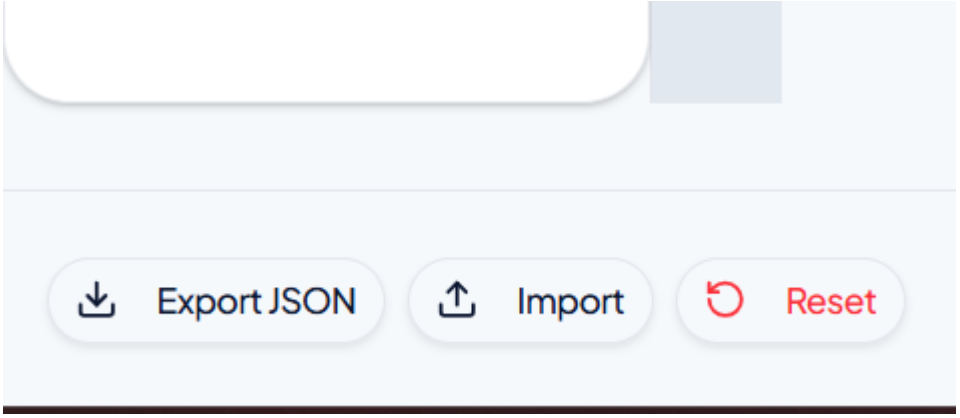


- Need notification if any change made to let the user know about it.
- Both logic section is not working or getting update on real time.
- **DELIVERY CULTURE / DIMENSION**
- **SYSTEM CONTEXT / CHALLENGE**

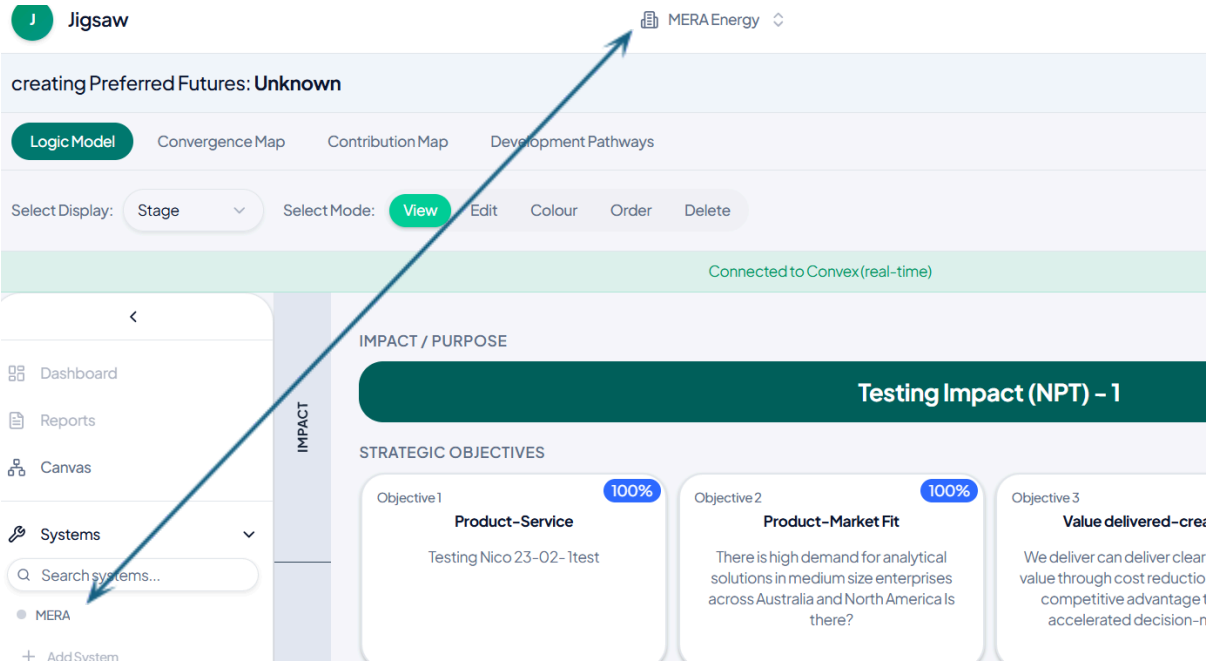




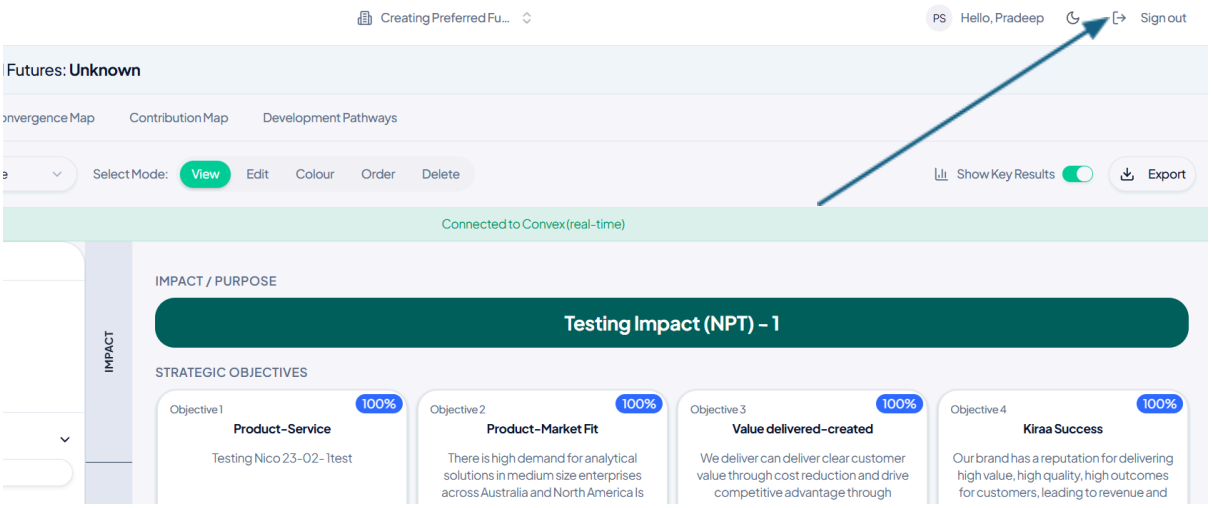
- Need to set the functionality for the settings and profile which include the persona of the user.
- Dashboard and reports ad well



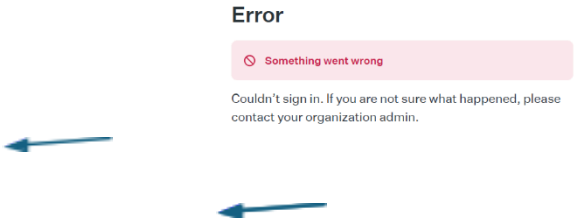
- Both export Json and import button not working.
- Reset button working and gets notify if the user want to reset it which is good.

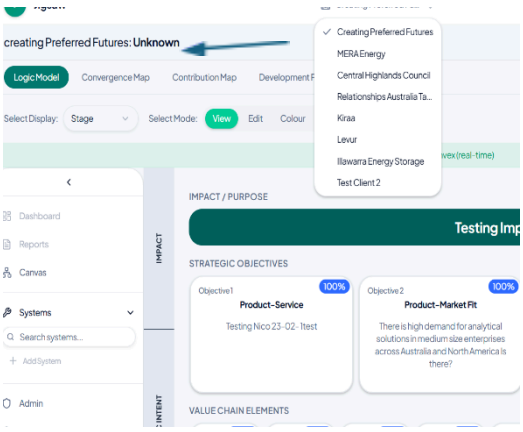


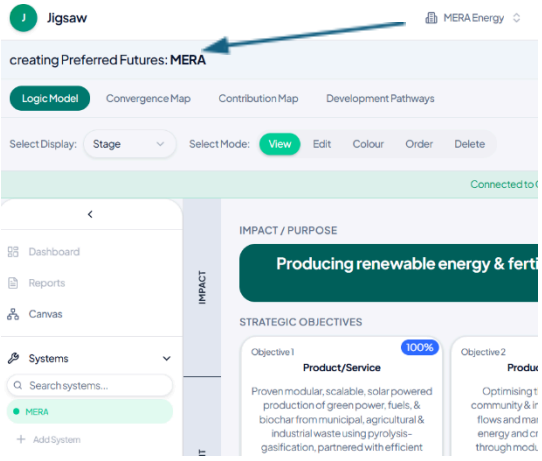
- Need to click two button to get into the system (Clients) and go through the jigsaw.



- Sign out need to go the back to the sign in page instead of error 404







On selecting the clients CPF shows unknown and for MERA Shows MERA
